

A connected ERP for everyday institute work.

A single operating system for admissions, student records, academic delivery, fees, parent communication, and leadership visibility.

Admissions first

Track every enquiry, counsellor action, follow-up, and conversion.

One student record

Connect fees, attendance, exams, communication, and parent access.

Built to grow

Start with one centre and expand through secure, reusable modules.

One system, connected end to end.

Each module serves a clear team, while sharing the same student, batch, and activity record.

Admissions CRM

Enquiries, counselling, follow-ups, conversion

Student Core

Profiles, parents, documents, enrolments

Academic Operations

Batches, timetable, faculty, attendance, exams

Fees & Communication

Plans, dues, receipts, notices, parent updates

SHARED SYSTEM FOUNDATION

Staff and parents

Lakshya ERP

Secure API

Institute database

The web app and API are delivered together as one managed service. The database stays separate and protected, so the product remains simple for the institute and maintainable as modules grow.

The right view for every person.

The ERP does not show the same dashboard to everyone. Each role sees the actions and information needed for their day.

DECISIONS

Owner / Director

Admissions health, collections, approvals, branch performance, and exception alerts.

CONVERSION

Admissions Team

Lead desk, tasks, calls, counselling, follow-ups, and conversion handoff.

OPERATIONS

Academic & Accounts

Batches, attendance, fees, receipts, timetable, exam activity, and student records.

VISIBILITY

Parents & Students

Attendance, fee status, timetable, results, notices, and support requests.

PRODUCT EXPERIENCE

Focused workspaces, not crowded pages.

Every page has one primary job: create a lead, handle a follow-up, record attendance, collect a payment, or review a student. Details open only when they are needed.

Admissions first. Built to expand.

The first release establishes a usable workflow and the shared data foundation for every future module.

01

Lead capture

Website, walk-in, calls, WhatsApp, referrals, and campaigns enter one pipeline.

02

Counsellor control

Assignment, task ownership, notes, counselling, reminders, and an accountable follow-up rhythm.

03

Admission conversion

Confirmed leads become a student record without duplicate data entry.

04

Connected expansion

Fees, batches, attendance, parent updates, reporting, and academic operations follow on the same foundation.

The result

Lakshya gains one reliable source of truth for every lead, student, payment, class, parent interaction, and decision.
